

microflex® 933 Valve Clean Granulate

Special cleaning granulate for inlet and outlet valves and the surrounding ducts. Fast, effective and material-conserving cleaning thanks to the specific granulate grain size and geometry.

Properties

- ✓ Effective cleaning thanks to the granulate adjusted to the type of contamination
- ✓ Specific grain size — ensures consistent product quality
- ✓ Specific geometry — no sharp-edged or compressing properties, therefore no abrasion, wear or damage to the respective surface structure
- ✓ Simple and reliable application — with 936 neutralisation solution residual particles of the granulate can be broken down
- ✓ Not a hazardous good
- ✓ No hazard labelling (hazard symbols, hazard warnings)

Application area

- ✓ For cleaning inlet valves and inlet ducts
- ✓ For cleaning outlet valves and outlet ducts

Instructions

Use with cleaning tool TUNAP 13400V1 Valve Clean System. Refer to SI 933 before use!

Dosing

For 1 vehicle (4 cylinder), 2 cans of 933 valve cleaning granulate are required. 1 can of 936 neutralisation solution is sufficient for up to 3 vehicles.

Notice

- ✓ After cleaning we recommend the regular use of 974 system agent concentrate petrol or 984 system agent concentrate diesel.
